Governance and APLs – Work Methodology

Our consultancy team has analyzed the governance issue, one of the main aspects to understand the cluster's evolution and to foresee ways of potential development.

The first step of the work has been the selection of five Brazilian cluster to be deeply analyzed.

After a careful discussion the choice we took was:

1. The ICT cluster of Recife, State of Pernambuco, in the North-East of Brazil
2. The Agro-Food cluster of Picos-Teresina, State of Piauí, in the North-East of Brazil
3. The Metal-Mechanic cluster of Resende, State of Rio de Janeiro, in the South-East of Brazil
4. The Medical Equipment cluster of Ribeirão Preto, State of Rio de Janeiro, in the South-East of Brazil
5. The Biotechnology cluster of Belo-Horizonte, State of Minas Gerais, in the South-East of Brazil.
